

Town Council Held Regular Meeting Last Week

At the council meeting held last week Mayor Sutermeister and Councilors Murray, Bob Brown, Anderson, Tom Brown and Schmidt were present. There was quite a bit of business transacted.

A. N. McLeay was present and wanted to rent the piece of property beside the irrigation lake for pasture for his cow. The matter was discussed at length and it was thought that the property would be better left open rather than fenced off as Mr. McLeay wanted to do. The meeting decided to leave the property open for the time being.

The town has the title to a house in which a couple of families are living but for some reason no rent is being paid for use of the property. The council set a rent at \$12 a month and in the meantime the matter will be taken up with the department of municipal affairs regarding the matter.

The mayor informed the council he had been to see waterworks firm of Davies and Tippey. They informed him they would send down plans and specifications for a new pump house.

It was decided there would be no storing of bones in the town. The shipment as they emitted a powerful strong unpleasant odor and passes by objected to having their factory refuse refuse (and of the fact).

The mayor advised the council that 500 sacks of cement had been ordered from Silver Star Supply Co. Ltd. in Calgary, and that they were to be delivered 100 sacks at a time. The secretary was instructed to see the town engineer regarding levels set for sidewalks.

The secretary was delegated to see the town engineer regarding the nuisance ground and that the matter be tabled until next meeting. He will also see Mr. Boyd.

The Petrol Industries made application for permission to install two gas pumps on the west side of their building. This was granted.

A long petition was before the council requesting that the town go on fast time. On a motion being made and carried it was decided to adopt fast time.

O. K. Crosssett exchanged a lot with the town on one adjoining his property.

A letter regarding the prices of cement mixers was filed. An application had been received for a lot on which to build brooder houses but the applicant forgot to state where he wanted the lot. A letter had been received from the inspector of amusement places regarding the hall. The council moved that the inspectors requests be complied with. There was a letter from the Calgary Stampede Committee inviting the council to send a delegate to their meeting.

The estimate had been received on toilets for the Community Hall. The matter was left in the hands of the hall committee to look into the matter back to the next meeting. Copies of orders placed with the various firms for the material for the new water works system had been received from the engineers. The council confirmed the orders.

The auditors report for the first 3 months of this year was read and adopted. The secretary was instructed to place an order for more sewer tile. The department of public works had written the town regarding the beautifying the post office. The town was requested to do the work and bill the government.

There was some discussion of the tie posts for the Indians behind the town office in the matter of the road to do nothing for the time being. Owing to the fact that quite a lot of difficulty is being experienced in obtaining the debenture for the road that a new by-law be drawn up excluding the callable clause since this seemed to be the most reasonable one and was not saleable. This amendment would have to be forwarded to the Public Utilities Board for approval.

A new fire extinguisher was presented to the council for examination. After inspecting it was decided to buy one.

There is much speculation about the 1946 population figure of Canada recently issued by the bureau of statistics. The annual estimate of population is for June first of the year and is based on three factors, (a) and (b) and (c).

BREAVER WINS A CANOE

A century old tradition was renewed in the Port of Montreal when a head-banded canoe was presented to Capt. J. Hisset Smith, O.B.E., skipper of the Canadian Pacific Steamships

excess of births over deaths since the last census (b) immigration and emigration, (c) ration book distribution. The last is a new and very dependable element in the estimate. The prairie provinces have a five year census so that the 1946 figures for those provinces are by actual count. The total increase in population in Canada for the five years since 1941 census is 801,000, approximately three quarters of one percent, but the significance for students of Canadian political economy, lies in the gains and losses by provinces. The highly industrialized provinces of Quebec and Ontario showed population gains of 3.9 percent and 8.4 percent respectively; British Columbia had a population increase of 22.6. The natural increase in population in Canada in recent years (excess of births over deaths) has been 1.4 percent per year and accounts for 64 of the five year increase which means that Quebec, Ontario and British Columbia gained 2.2, 2.3 and 16.4 respectively from other sources. Alberta with a gain of one half of one percent held only a small part of its natural increase.

There was to have been a Board of Trade meeting Monday night but for some reason or other the members failed to turn out. In fact a grand total of five turned up. After waiting fifteen or twenty minutes all wondered their way home wondering what happened to the other forty or fifty members. Jimmy Wright, the secretary, was perturbed over the failure to have a meeting. He has to tote around the minute book which is an enormous affair and very heavy. This book was purchased at the turn of the century, many years before Jimmy was born, by the first secretary, who evidently was a far sighted man and thought the book would last Gleichen till the end of time. The book may last a long time yet before it is filled but when Mr. Wright has to tote it he does not look at it in a very lovingly manner.

Dr. Windsor was an Edmonton visitor last week.

Senator Gershaw Writes From Ottawa

The telephone business of the North American continent is a huge monopoly in a general way. The three prairie provinces have their own telephone systems but in Ontario, Quebec and the United States the Bell Telephone Company is in control. In British Columbia, in southern Alberta, and the Philippines the Associated Telephone and Telegraph company has the telephone systems.

Most people will agree that a great utility of this kind should be a government monopoly.

The whole problem was debated recently when the company operating in British Columbia asked the Dominion Government for the power to increase its capitalization from 11 to 25 millions of dollars.

Members who spoke on it expressed the opinion that the telephone service has been fairly satisfactory in British Columbia. It was realized that many new telephones would need to be installed and more money would be needed for this purpose.

There is a testing period for business, no sane merchant is going to begin a private war of his own and start prices sky rocketing, he has to live by his community too. Knowledgeable men are more and more aware of the responsibility of freedom and are not likely to gamble with the future of their business. The picture of 1921 still looms darkly upon the horizon when more than ten thousand houses went to the wall when the crash came after sky rocketing prices burst.

The fact that people from coast to coast are urgently asking that controls be kept on the main articles of everyday living is proof of the success of a price control policy, that was caused for Canadians of the last out cost of living rates in the world.

cargo-passenger liner Beaverburn

for being the first to bring a deep sea ship into Canada's greatest port this year. Capt. Smith, a veteran of both world wars, docked his vessel a scant hour ahead of his nearest rival,

climaxing one of the closest races of several years. Above, he is seen receiving the cane from A. G. Murphy, port manager, while William Manson system vice-president of the C.P.R., looks on.

Mr. Church of Toronto argued that the granting of this would enable the company to, as he expressed it, "cut a fine juicy melon." He feared that the shares would be divided and that shareholders would get several new shares for each one now held and would thus have an unfair profit. He predicted that the next stage would be an increase of rates for the telephone subscribers.

However, all parties in the house favored the bill and were assured that no increase would ever be asked for on this account and never on any account unless wages and costs increased to a very great extent.

It was pointed out that a publicly owned monopoly, like the post office takes on services in localities at a great loss for the sake of the people in sparsely settled areas. This is not usually done by a privately owned system but this telephone company assured the members that they would serve these very districts if at all possible.

After receiving first and second readings in the house the bill went to the railway committee where agents and officers of the company were present to give full information and to answer any questions. It was agreed to there and then to come before the committee of the whole house where it was again debated. Finally it was reported by the chairman of the committee of the whole to the Speaker who resumed the chair. It then passed the third reading and became law. It had passed with Mr. Church being the only one to oppose it and no recorded vote was taken. The Speaker just called for ayes and nays.

There was to have been a Board of Trade meeting Monday night but for some reason or other the members failed to turn out. In fact a grand total of five turned up. After waiting fifteen or twenty minutes all wondered their way home wondering what happened to the other forty or fifty members. thousand feet they had to sell locally and a profit on the lumber they were allowed to export.

In spite of the fact that the local supply was so much greater each year than in the years before the war the retailers found great difficulty in getting lumber. For this reason some changes were made recently in the ceiling prices and the controls are gradually being removed.

Newspapers all over the country have whole pages filled with advertisements of houses for sale, but there are really no houses to rent. With the hope of easing this situation the rental control officers have in some cases allowed higher rents to be charged but it is likely that in the U.S.A. the rental controls will be about the last to go.

Roofs and Eavestroughs

with

Imperial Roof Putty Flux

IMPERIAL ROOF PUTTY FLUX

This liquid asphalt has many uses on the farm. Easy to apply, it coats your roofs and eavestroughs with a hard, tough, weather-proof surface that is fire-resistant. Cracks are filled, rust and leaks prevented. Imperial Roof Putty Flux has unusual filling, sealing and coating qualities that protect surfaces, prolong life, and save on repairs. Here are some of its many uses:

- Protects metal and felt roofs and eavestroughs.
- Preserves fence posts and well casings.
- Waterproofs cement foundations.
- Cements window frames.

In 1939 a little less than 4 billion feet were produced, and 58 percent was exported. In the last war year 5 billion feet was the production and 42 percent was allowed to be exported.

Most people are aware that the domestic market got one and three quarter billion feet in 1939 and over three billion feet in 1946.

Then the mill owners were not only compelled to sell a large portion of their product in Canada, but they were forced to sell at the ceiling price that was all through the war about fifteen dollars per thousand feet below what they would net for that portion they were allowed to export.

The lumbermen also increased costs as regards wages and materials. They then claimed that there was a loss of ten to twelve dollars on every

IMPERIAL OIL LIMITED Farm Division

Trends In Immigration

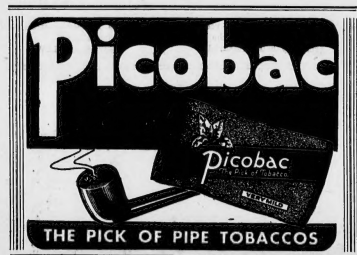

INTEREST IN IMMIGRATION has increased greatly since the war, not only in Canada, but in many countries. Six years of warfare left the necessity of rebuilding many thousands of homes, factories and stores in those areas which had been laid waste. Elsewhere, because of the almost complete direction of manpower and materials to meet the requirements of the war, there was built up an accumulated need for the many commodities which had been neglected during the war. The war had also put a tremendous demand on production in the tendency towards the raising of general living standards and a consequent increased demand for many products. All this has created unprecedented needs for skilled workers, and has had a marked effect upon the post-war attitude toward immigration.

Labor Office Issues Report

see any great immigration movements such as took place between Europe and this continent early in the present century. It appears that while many countries are now interested in receiving immigrants they are interested in taking in only small and selected groups, usually with preference for skilled workers who fill some specific need for labor in the country which they enter. This is described by the International Labor Office as a short-term solution which is being used by many governments while more permanent policies are being formulated.

Policy Changes Are Predicted

there are no longer many great unoccupied areas to be settled. Mexico and South America are now the only places which are open to settlers in large numbers, and in South America there is a marked preference for skilled immigrants. Australia and New Zealand have at present restricted immigration, and require a high standard of education, although she has room for many new immigrants, will not admit unskilled workers. The United States, on the other hand, will accept immigrants in any number appears to be Italy, and Britain, Belgium, France and Sweden are securing workers from there to help with the gigantic post-war tasks. From all this it is clear that policies on immigration have changed in recent years and that the present tendency is towards the movement of small and selected groups rather than the mass migration of earlier times.

FAMOUS MOSQUITO PLANE ABANDONED

OTTAWA. The Mosquito, the once spectacular, all-wooden jack-of-all-trades of the Wartime Empire Air Forces, has been abandoned as an active combat aircraft by the R.C.A.F. A victim of maintenance problems and of the Canadian climate and of its own trickiness in handling, the "Moskie" thus joins the equally celebrated Spitfire as Canadian hardware in the face of aeronautical advances that will make the jet-propelled Vampire the basic fighter plane of the R.C.A.F.

As a result of the ongoing counter-part, the Lancaster carries on as a peace-time operational aircraft. The Spitfire had not been counted on in post-war planning but the Mosquito had, for some time, been a spare part of the R.C.A.F. officials reserve various reasons for disposal of nearly all their Mosquitoes.

For one thing, their trickiness in manoeuvring made war-time fatalities in takeoffs and landings that in actual combat for their 2-man crews.

SMUTS 50 YEARS WED

CAPE TOWN. — Prime Minister Smuts, 77, the father of six children, celebrated his golden wedding anniversary with his wife recently. The Parliamentary caucus of the United Party, of which he is the leader, presented him with a wood and gold casket.

The modern cranberry has a high acid and low sugar content, and is rich in iodine, vitamin C and other food values.

TEMPTING HIS FEATHERED FRIEND — Joseph "Brownie" Bond, eight-year-old Quaker city schoolboy, of Philadelphia, is shown holding a cracker in his mouth, invitingly tempting his pet pigeon, "Pee-Gee", to help itself to a nibble. "Pee-Gee" was awarded first prize as the "friendliest pet" at the Germantown boys' club pet show.

FUNNY *And* **OTHERWISE**

Old Rastus settled himself in his chair and addressed his wife: "Yes, sah, Gal, dat boss done cut wages half in two again. Some ob de boys is kickin' might' powful 'bout it. Way I figers it—half of sumpin' is better'n all of nuffin'."

They were entertaining the vicar to lunch, and the guest remarked to the small boy of the house: "Don't you ever say prayers before your meals, my child?" "Oh, no," said the child, "Dad says our cook's pretty reliable."

"Portah, portah! Come heah at once!" cried an English woman from a train window to a Scots porter in that aggravated accent that always seems to put a Scotsman's back up.

"What d'ye want?" asked the

"Portah, I've lost my luggage."
"Then," he said, turning round
and strolling away, "for what wad
ye be wanting a porter?"

Town & District

Cleanup duty last Wednesday was not the howling success it should have been since very few turned out to help. However the few that did turn out did wonders and made the town look a whole lot nicer.

McLean editor of the Strathmore Standard was a visitor to town for some hours last Saturday afternoon. He was enroute to Winnipeg and had come to Gleichen to board the east bound train.

Barney Wood, the local auctioneer states he will hold a community auction sale on Saturday May 31st. Meantime all those who want to put things in the sale are requested to enter them at once.

Col. Amy and Bob Bick are heading the high school baseball teams of which they hope to field four teams. This week three practices are being held. Anyone who is interested in baseball is requested to turn out and play. Baseball has its serious side. While acting as catcher Mr. Bick received a foul tip on his Adams apple and was unable to talk for a time.

Mr. and Mrs. W. Gilbert of Worthing, Sussex, England, arrived in Gleichen on Thursday to visit at the home of Mr. and Mrs. Geo. Evans. While overseas Cam Evans spent many of his leaves at the Gilbert home. At all times their home was open to the Canadian boys and while

Dragnet Extended For E. B. Bottles

Potatoes organize for search in Alberta rural centres.

The "Dragnet" for E. B. Bottles, alias "Empire" widened today as search extends to Alberta's many towns and villages.

E. B. Bottles, commonly known as Empty Beer Bottles, became the subject of this intensive hunt following disappearance from essential duty in the bottling and brewing industry. Citizens are co-operating in an all out effort to see that this culprit is brought to justice and returned to work so that the demand for Brewery products can be met.

It is believed that "Empires" may be lying low in basements, closets, attics, garages or other places about the home, and for this reason the co-operation of housewives in aiding the search is particularly requested.

CASH REWARD OFFERED

Housewives in cities, towns and villages are urged to search their premises throughout. Deliveries Limited should be notified at once. They have arranged to take "Empires" into custody—pay 20 cents per dozen cash reward on the spot and provide escort to the nearest bottle depot.

Rural citizens who may come across "Empires" can have him escorted, freight collect to the nearest Deliveries Limited depot and cash reward will be mailed immediately he is in custody. Depots are located at Camrose, Banff, Calgary, Edmonton, Blairmore, Medicine Hat, Drumheller and Lethbridge. McLean is nearest depot for Peace River District.

In Canada for a year they hope to visit several of the boys they entertained during the war years. Their home is located on the English Channel opposite France. They saw many an air battle including the big battle when the Germans lost 195 airplanes in one day. The Germans lost many a bomb near their home but some how another they and their home escaped injury. They also saw the great air raids by the allies begun in their area. They say it was a great sight to see the allied planes spiraling to gain altitude while every moment other planes would lift the rising column until there were hundreds in the air. When all the planes would dip straight down and head for enemy territory. Meantime they could not help wonder how many of those planes would not return.

UNITED CHURCH NOTES

The Service of Worship will be held next Sunday evening at 7:30 and 8:30 Daylight Saving Time. Sermon topic will be: Inheritance that Sustains.

SEEDTIME AND HARVEST
By GREANEY
Director, Service, Winnipeg, Manitoba.

Research on Weed Control

It has been reliably estimated that the direct monetary loss from weeds in Canada is not less than \$200,000,000 a year. And this is not all. Year after year weeds continue to rob this country of the very soil resources which it is our responsibility and desire to protect and conserve.

Weed Research. The results of controlled experiments and the records of practical experience in this country leave no doubt that, as a source of loss farmers, who rank in importance with plant diseases and insect pests. Yet, what do we find? We have built up large and efficient organizations in Canada to deal with problems relating to the ravages of plant diseases and insect pests; while, with few exceptions, the all-sides consider weeds the incidental responsibility of a handful of botanists, agronomists, and other agricultural scientists. This is not good enough. Our weed problems are enormous, and many of them can only be solved by a well-organized and properly directed program of research. In no field of agricultural research is there today a greater need for an organized national effort than in weed control. Weed control is, in fact, a national problem calling for national effort.

Research Assistance. Realizing the great need in Western Canada for more research on weeds and their control, the Line Elevator Companies sponsoring this project recently made available to the Division of Plant Science, University of Manitoba, the sum of \$1,000,000 for weed research. This grant will be used in 1947 to investigate certain special problems in the field of selective chemical weed control. We are convinced that the results of research on weed control will bring immense benefits to the farmers of Western Canada, and through them, to the whole community.

TREES GROW RAPIDLY IN EARLY SPRING

Two main reasons why trees grow rapidly in early spring particularly under prairie conditions are: First, there is an extreme change in spring temperatures as compared with winter temperatures. Second, after a season of arrested growth, lasting from early or late September to early or late April, the power of renewed growth from stored food when a favorable environment returns can be readily understood.

The majority of woods plants have a more or less determinate period of growth. Two well known trees, Green Ash and Oak Buckeye, have a very specific and rather restricted period of growth, while two other equally well known trees, Scots pine and Boxelder, enjoy a longer and less specific period of active growth.

However the most active period of growth for trees in both categories occurs during the early spring months. For the most part what occurs after that active period of growth ends is the internal maturation of the new buds from which fresh growth, in the form of leaves and stems or flowers, will take place the following year.

In sheltered management planters should, therefore, hold continually a "next year" and "next year" perspective, because for the well being of trees the external conditions influencing both periods of development, that is, in early summer and late summer, should be maintained as favorably as possible.

From the time snow disappears in spring until, it returns in the fall every effort should be made to see that trees make the best possible use of available moisture and irrigation water. This means eliminating weeds on other competitive plant growth per mitting a free movement of air and water into, and out of, the soil, destroying or controlling injurious insects and diseases and protecting the trees. These conditions can be carried out only by periodic and systematic inspection of trees, and efficient cultivation of land adjacent to the trees throughout the year.

GROW MORE BARLEY

FARMERS! There is a **FLOOR PRICE ON BARLEY OF 90 CENTS**, basis No. 1 Feed, delivered **FORT WILLIAM — PORT ARTHUR or VANCOUVER** for all barley sold between August 1, 1947 and July 31, 1948. The price may be higher but it cannot go lower.

Canada is short of barley as feed for live stock. More barley is necessary for the maintenance of Canadian live stock and the production of urgently needed live stock products. Farmers can grow barley this year with the assurance that all barley sold until July 31, 1948 will bring not less than 90 cents a bushel, basis No. 1 Feed, at Fort William—Port Arthur or Vancouver.
